

**Front End:**

```

<!DOCTYPE html>
<html>
<head>
    <title>Login Form</title>
</head>
<body align=center>
    <h1>Login Form</h1>
    <form method="post" action="validation.php">
        <label>Email/Username:</label>
        <input type="text" name="email"><br><br>
        <label>Password:</label>
        <input type="password" name="password"><br><br>
        <input type="submit" name="submit" value="Login">
    </form>
</body>
</html>

```

**.PHP:**

```

<?php
$email = $_POST['email'];
$password = $_POST['password'];

$conn = mysqli_connect("localhost", "root", "", "mydb");

if (!$conn) {
    die("Connection failed: " . mysqli_connect_error());
}

$sql = "SELECT * FROM users WHERE email='$email' AND password='$password'";
$result = mysqli_query($conn, $sql);

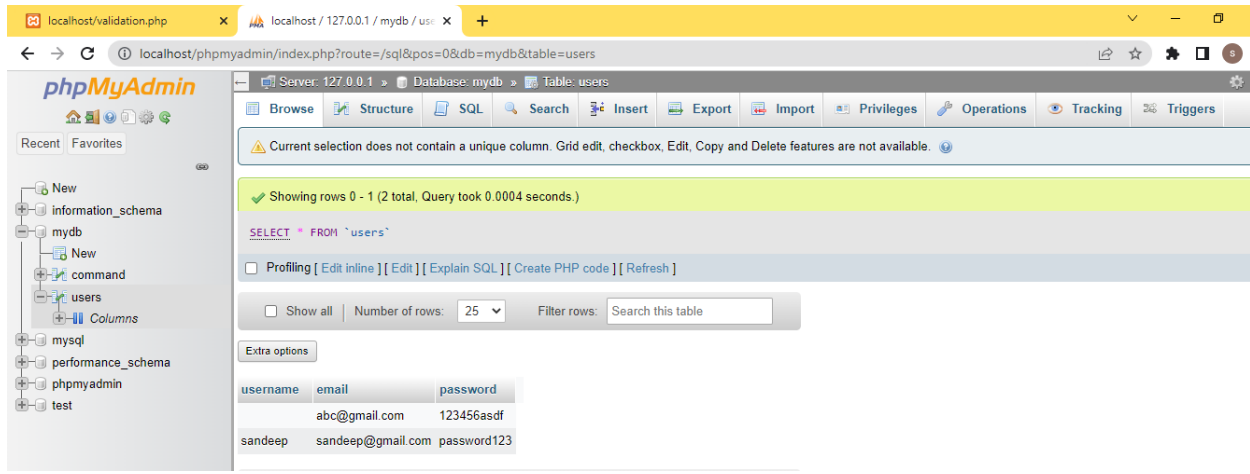

if (!$result) {
    die("Query failed: " . mysqli_error($conn));
}

$rowcount = mysqli_num_rows($result);
if ($rowcount > 0) {
    echo "Login successful $email ";
} else {
    echo "Invalid email or password";
}

```

```
mysqli_close($conn);  
?>
```

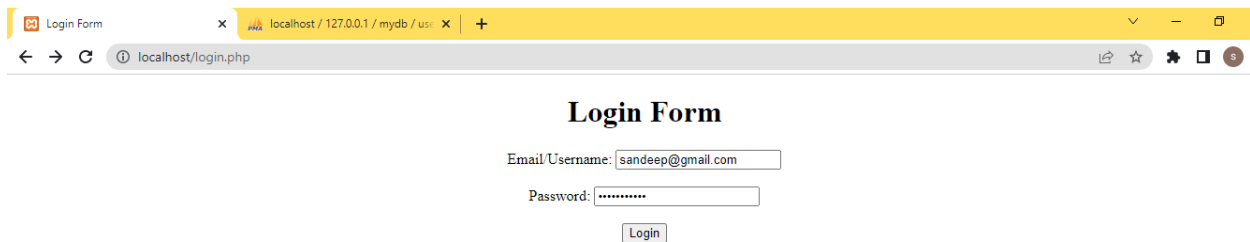

## Database:

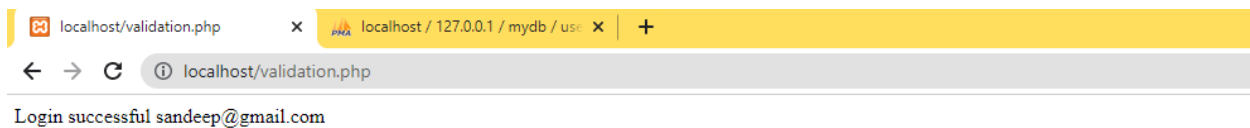

The screenshot shows the phpMyAdmin interface. The left sidebar displays the database structure with 'mydb' selected. The main panel shows the 'users' table with the following data:

username	email	password
	abc@gmail.com	123456asdf
sandeep	sandeep@gmail.com	password123

## Output:

The screenshot shows a web browser displaying a 'Login Form'. The form has two input fields: 'Email Username' and 'Password'. The 'Email Username' field contains the text 'sandeep@gmail.com'. Below the fields is a 'Login' button.

The screenshot shows a web browser displaying the output of the login process. The text 'Login successful sandeep@gmail.com' is displayed on the page.
